To Whom It May Concern:

It is my pleasure to provide a reference for James Morgan, who worked part-time for Blue Orb, Inc. in the capacity of Programmer and QA Tester.

Blue Orb develops advanced software and input systems for gaming, computing and communications devices. James was a member of the technology team that developed our video game product, SwitchBlade™. This is cutting-edge software that brings a fully configured game controller experience to the most popular PC games, beginning with World of Warcraft®. James tested the release of the product for World of Warcraft®, and was instrumental in the development and testing of subsequent releases for other games.

James is an intelligent, capable and personable young man. He is a quick study, evidenced by his ability to grasp our technology with limited training. He is also able to balance both the strategic and tactical needs of the business. He can be counted on to remain calm during stressful deadline-driven situations. Additionally, we found him to be a very good planner, which coupled with his personal drive and initiative, will make him a valuable asset for any organization.

In summary, I highly recommend James for any position or endeavor that he may seek to pursue.

Please don't hesitate to contact me if you require additional information. I can be reached directly at 407-622-7774, or through email at [elaine@blueorb.com](mailto:elaine@blueorb.com).

Regards,

Elaine Kirchner  
Business Operations Manager
